## Paragraphs

A paragraph (from the Greek paragraphos, “to write beside” or “written beside”) is a self-contained unit of a discourse in writing dealing with a particular point or idea. A paragraph consists of one or more sentences. Though not required by the syntax of any language, paragraphs are usually an expected part of formal writing, used to organize longer prose.

[\[Top\]](#).

## Blockquotes

A block quotation (also known as a long quotation or extract) is a quotation in a written document, that is set off from the main text as a paragraph, or block of text.

It is typically distinguished visually using indentation and a different typeface or smaller size quotation. It may or may not include a citation, usually placed at the bottom.

*Said no one, ever.*

## Inline elements

This is a text link.

**Strong** is used to indicate strong importance.

*This text has added emphasis.*

The **b element** is stylistically different text from normal text, without any special importance.

The *i element* is text that is offset from the normal text.

The u element is text with an unarticulated, though explicitly rendered, non-textual annotation.

~~This text is deleted~~ and This text is inserted.

~~This text has a strikethrough.~~

Superscript<sup>®</sup>.

Subscript for things like H<sub>2</sub>O.

This small text is small for for fine print, etc.

Abbreviation: **HTML**

“This text is a short inline quotation.”

*This is a citation.*

The *dfn element* indicates a definition.

The mark element indicates a highlight.

The *variable element*, such as  $x = y$ .

The time element: 2 weeks ago
